Product & Business: Technical Product Management, Product Thinking, Stakeholder Management, Client Management, Operations, Business Execution, Problem Solving

Frontend: React, JavaScript, TypeScript, HTML, CSS, SCSS, Tailwind CSS

Backend & APIs: Python, Django, Flask, Node.js, REST APIs

Data & Platforms: MySQL, MongoDB, Firebase, SQLite, PostgreSQL

AI & Engineering: AI Integration, OpenCV, Computer Vision, Blockchain

Tools: Git, GitHub, Docker, VS Code

PROFESSIONAL EXPERIENCE

YARS Solution — Senior Manager | 2022 – Present

- Lead day-to-day operations, production planning, client coordination and delivery across 50+ national and international clients.
- Manage priorities, resolve operational issues and coordinate execution against deadlines.
- Work across business requirements, stakeholder communication and practical execution to keep delivery on track.

AutoVid.ai — Full-Stack Developer | 2021 – 2022

- Built production web interfaces using ReactJS and developed responsive pages with HTML and SCSS.
- Integrated frontend applications with RESTful APIs and worked across frontend implementation and product requirements.
- Contributed to full-stack product development across user interfaces, API communication and application workflows.

Nibodh — Web Development Trainer | Aug 2021 – Nov 2021

- Taught HTML, CSS, JavaScript, ReactJS and Django through practical, project-based web development.

Digicraft Solutions — Full-Stack Developer Intern | Jul 2020 – Nov 2020

- Worked on a ReactJS admin panel for a Thailand-based insurance company, a MERN-based web application and NodeJS backend development.

Project INKalaab — Web Developer | Jan 2019 – Jan 2020

- Worked on Squarespace development, website maintenance, UI/UX improvements and digital presence for a podcast project.

SELECTED PROJECTS

AutoGenerate.ai — AI / SaaS | React, JavaScript, REST APIs, AI

- Built an AI-focused web application for content generation and AI-assisted workflows; contributed to frontend development, API integration and AI workflow implementation.

Inventory Management System — Full-Stack Application | React, TypeScript, Flask, Python, REST API, Tailwind CSS

- Built a full-stack inventory platform for product and stock management using a React/TypeScript frontend and Flask REST API backend.

AAGHAAZ — Product / Event Platform | Web Development, Event Management, Virtual Trading

- Developed a deployed digital platform around an inter-college management fest and its simulated stock-market trading experience.

HackVote — Blockchain | Blockchain, Python, JavaScript

- Developed a blockchain-oriented voting application exploring distributed records, verification and electronic voting workflows.

VivaStory Admin Panel — Internal Tool | React, Firebase

- Developed an administrative application for content and user management, including operational workflows and admin interfaces.

AI Chatbot — AI / Web Application | Django, Python, Database, Bootstrap

- Built a Django-based chatbot application with database integration and a responsive web interface.

Project Alpha — Computer Vision | Python, OpenCV

- Developed a Python/OpenCV project exploring image processing and computer vision workflows.

EDUCATION

MBA — Finance & Marketing — IMS Engineering College, Ghaziabad | 2021 – 2022

BCA — Bachelor of Computer Applications — Vivekananda Institute of Professional Studies, Delhi | 2018 – 2021
